

Boss Web Chair Series features:

- Upholstered with a unique “Web” mesh material which allows air to passthrough, adding to long-term comfort by preventing body heat and moisture build-up.
- Web back distributes weight evenly, and provides the perfect level of back support by conforming to each individual’s back shape.
- As with any fabric material, the “Web” mesh will stretch and loosen over extended periods of usage, however the Boss unique and patented **Web Tension Knob** (located underneath the seat) allows the user to tighten or loosen the tension of the mesh material with a few simple twists.
- Seat surface and the outer back are beautifully upholstered with genuine leather.
- Pneumatic lifter allows instant seat height-adjustment to fit the user’s needs.
- Tilt-tension adjustment lets the user easily control the tilt resistance felt when leaning back.
- Adjustable armrests allows each arm to be height-adjusted independently and easily.

◀ **Web Chair**

Seat: 20”d x 19”w • Back: 21”w x 23”h
 Overall: 22”d x 27”w x 42-47”h
